Who is TradingBro?

Your investment remains in your personal account, which only YOU have access to.
My focus is always on a balanced approach between returns and maximum capital protection.
I look forward to welcoming you as a partner.

Hello, I'm Viktor Kisman, the founder of TradingBro.
My goal was to develop a system based not on luck, but on mathematical stability.
A system I trust with my own capital.

TradingBro leverages the dynamics of market openings in London and New York. I combine a precise breakout strategy with an intelligent grid method. The crucial difference to conventional bots: I personally monitor every market phase.
During risky news events, I pause the system to protect your capital from unnecessary volatility.

For me, integrity means transparency.

TradingBro

Important to note

It is absolutely essential to use a separate trading account specifically for copy trading, and exclusively for copy trading. It is strongly advised against placing new manual trades in this account or manually editing or closing copied trades. Manual intervention can have devastating effects on the trader's risk management and lead to massive negative consequences for your invested capital.

ALWAYS USE A SEPARATE ACCOUNT FOR COPY TRADING! DO NOT INTERVENE MANUALLY!

NEVER CONNECT MORE THAN ONE TRADEPER PER ACCOUNT!

Verify

Now check your email inbox and confirm your email address via the link provided. Check your spam folder if you don't find the email in your inbox.

You will now be redirected to the RoboForex website and must verify your identity.
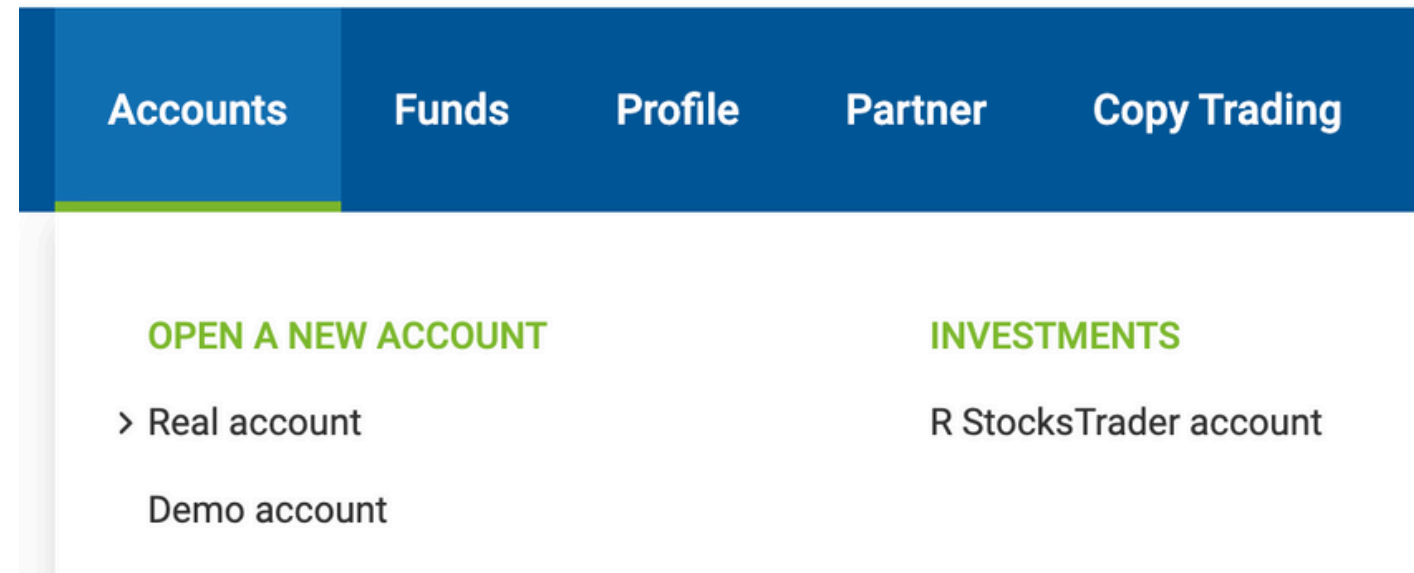

Enter your personal information and upload a photo of your ID card and/or passport.

Finally, you must also verify your address. Upload a recent mobile phone bill, utility bill, or similar document.

Then click Submit/Confirm, and once you receive the email confirming your account verification, you can fund your trading account.

Now click on Subscribe.

Link trading account

Click and open the following link to watch the performance live.
https://www.myfxbook.com/members/Vitea24/tradingbro/11835297

RoboForex allows you to adjust the ratio at which trades are mirrored to your account.

IMPORTANT!!! Make sure this setting is set to Proportional!!! This ensures the trades are copied correctly.

Changing this ratio will multiply the risk many times over, and a total loss is possible!
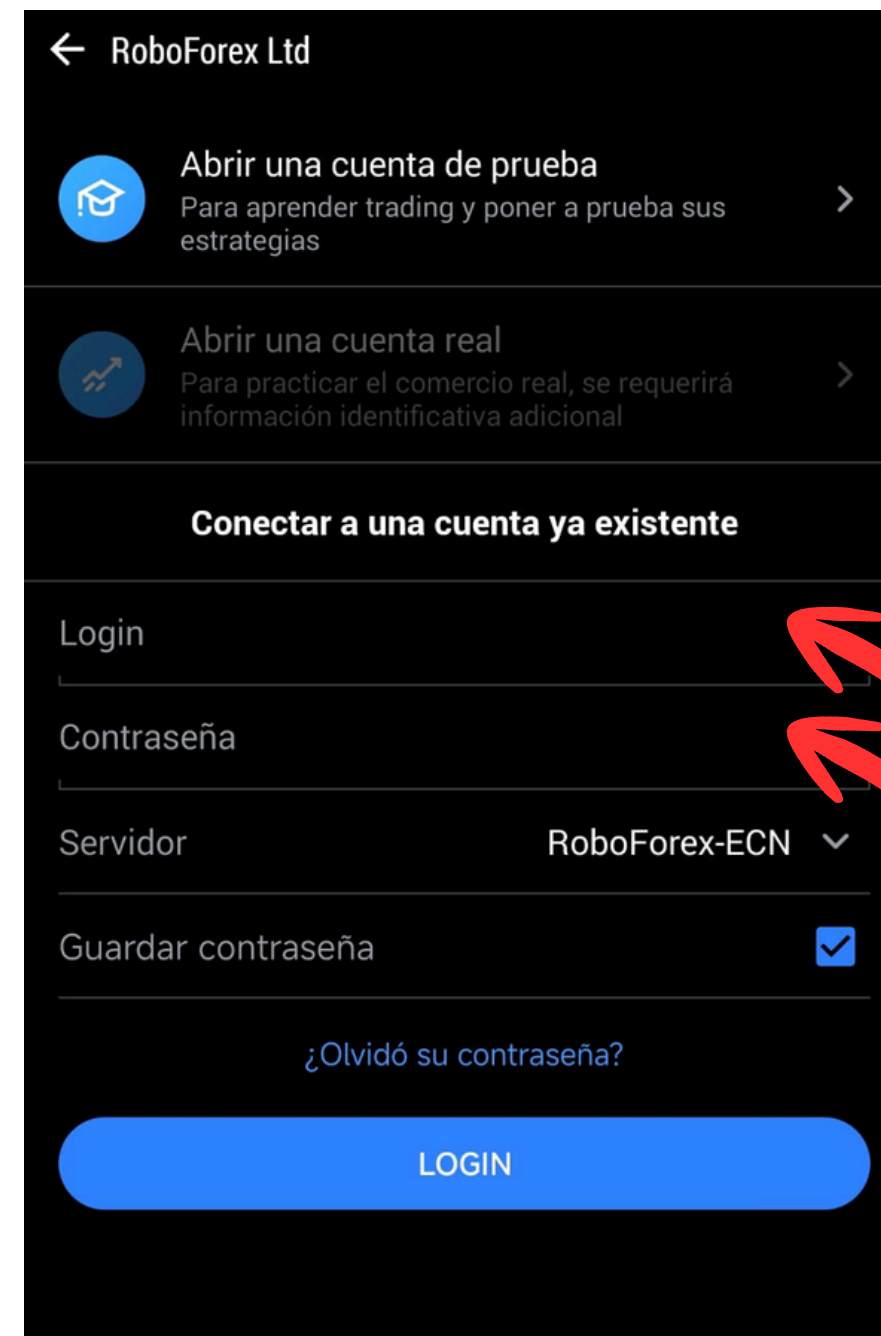

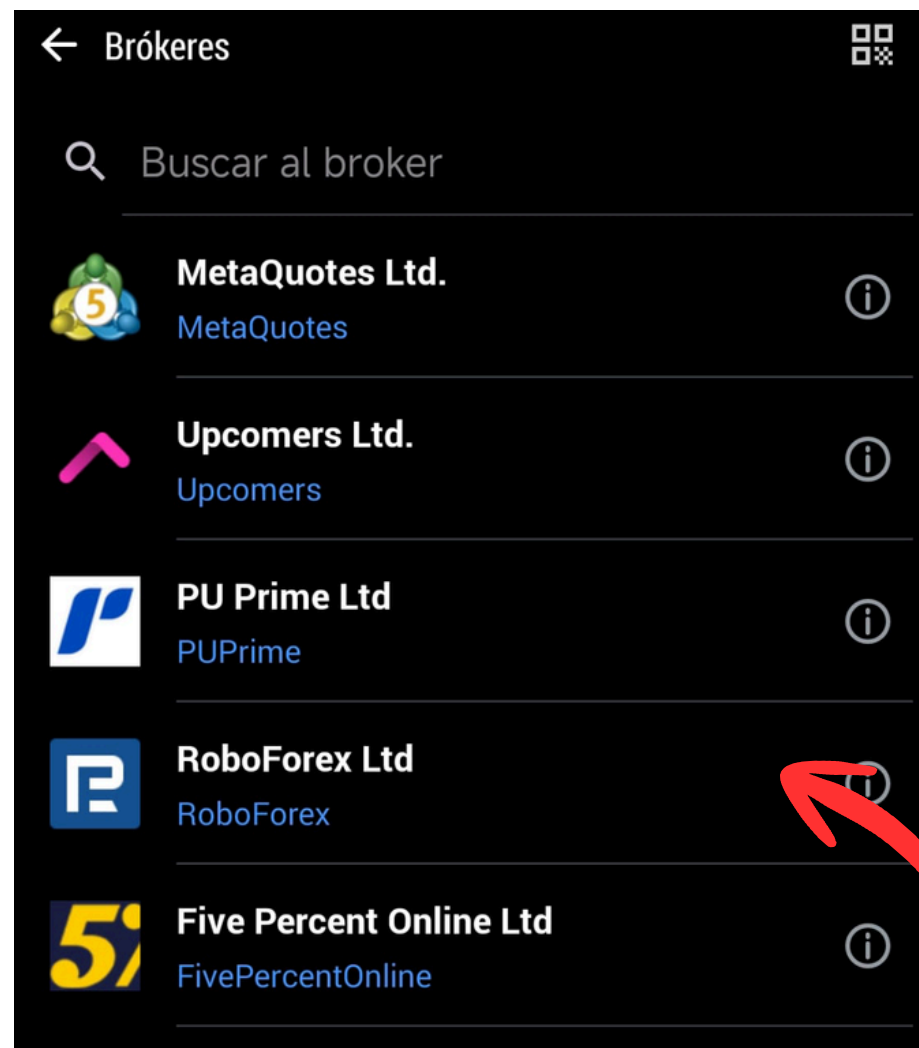

Click on "Subscribe to Trader." Ensure you have selected the correct account. You're now connected to TradingBro and will profit from every trade from now on.

You will now see your active account. You can connect as many accounts as you like.

Metatrader 5

Download the MetaTrader 5 app from the Play Store/App Store.

Select RoboForex as your broker and ECN as your server, then enter your account number and password.

Now you can watch TradingBro's trades live.

IMPORTANT: Do not change any of the trades. You have the option to close existing trades or open new ones yourself. Do not do this to avoid affecting performance or jeopardizing your account.

Thank You

Use the myfxbook link to monitor performance live.
